Figure 1 shows various map symbols and their corresponding text labels. The symbols are arranged in a grid-like fashion. The first column contains symbols for different types of roads: Highway (solid line), Secondary Road (dashed line), Jeep Trail/Walkway/Path (dotted line), and Railroad (line with cross-ticks). The second column contains symbols for different types of boundaries and features: Pipe/Power Line (line with cross-ticks), Ridge/Physical Feature (line with small triangles), Property/Fence Line (line with small squares), and Nonvisible Boundary (dashed line). The third column contains symbols for different types of water bodies: Stream/Shoreline (blue line), Intermittent Stream (blue line with wavy dashes), River / Lake (blue area), and Glacier (blue area with wavy lines). The text labels are: :Modality:, Inset, and Out Area.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A "+" following a place name indicates that the place is coextensive with a MCD. A "-" indicates that the place is also a false MCD; the false MCD name is not shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity. Nontribal census tract boundaries are shown outside of the subject entity. Tribal census tracts are defined by the Bureau of Indian Affairs as census tracts defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian household. Tribal census tracts are not shown for areas that are off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract.
- 3 A "+" following a block number indicates that the block number is repeated elsewhere in the block.
